

# Hydraulic Compactors

## SC-15T Hydraulic Compactor Features;

The SC-15T boom mounted plate compactor can take on the toughest compaction tasks. Designed for mini-excavators ranging from 2-7 tons, or (4400-15400lb) class. Compactors keep your crew out of the trench during compaction and are more productive than hand held equipment. Compactor Offers “Four-corner” shock mount suspension and a one year limited warranty.

## SC-115T Specifications

- \*Impulse Force-LBS-3000
- \*Cycles per Minute-2100
- \*Hydraulic Flow-GPM-8
- \*Operating System-PSI-2100
- \*Base plate Dimensions 12” X 28”
- \*Height-18”
- \*Pin Diameter-IN - Carrier Specific
- \*Compaction Area-SQ FT-1 to 3

## \*Weight-LBS-352

**APPLICATIONS** For soil compaction, the SC series can compact up to four feet – more than five times the efficiency of hand held compactors; without the associated safety and maintenance problems. For slope compaction, the SC series is the only way to efficiently compact materials on an incline. The SC Series can also drive fence posts, sheeting, I-beams, soldier piling, guardrails and pipe.
