EXCAVATOR

EXTREME SERVICE ROCK BUCKET

UNPARALLELED STRENGTH & PERSISTENCE

Push performance to the limits with the AMI Extreme Service Rock Bucket. Designed for extreme service applications such as road building, mining, and quarry applications, this bucket digs right in. Built with Hardox wear steel and Strenx Performance Steel throughout the complete bucket, the Extreme Service Rock Bucket comes standard with base edge weld-on segments and pin-on side bar protectors. The Extreme Service Rock Bucket features extra armor along the heel edges for longer life in highly abrasive conditions.

- Hardox Wear Plates and Strenx Performance Steel
- Base edge weld-on segments, base edge end protectors, heel shrouds and pin-on side bar protectors
- Dual-radius profile to reduce wear and tear
- Shell liners

EXTREME SERVICE MINING BUCKET

EXCEPTIONAL DIGGING AND WEAR RESISTANCE

Dig deeper and longer with an AMI Extreme Service Mining Bucket. Built with Hardox wear steel and Strenx Performance Steel throughout the complete bucket, the Extreme Service Mining Bucket features customized components designed specifically for your mining application and tailored perfectly to your machine. From custom replaceable wear parts and interior liners to extra plating, this heavy-duty mining bucket can take on the daily challenges of quarry and mining applications in the most demanding work conditions.

- Roll greater quantities of material toward your machine
- Wide bucket opening and longer floor design
- Tapered sides minimize wear and tear
- Available in semi-spade or spade nose edges

STRENX
PERFORMANCE STEEL

SOLID AS A ROCK

Make your point with the AMI Severe Duty Spade Nose Bucket. Built for handling rock in mining and quarry applications, the AMI Spade Nose loads easily with minimal wear. Reinforced plating on the bottom and Hardox wear plates make this bucket rock solid.

Optional components include:

- Inside bucket shell liner
- Bolt-on edges
- Weld-on teeth and adapters
- Pin-on side bar protectors
- Bolt-on edge segments
- Tooth adapter wear caps
- Custom wear components and liner kits
- Strenx Performance Steel maximizes bucket's strength to weight ratio

QUARRY EXTRACTING FORK

STRENX
PERFORMANCE STEEL

OUTSTANDING EFFICIENCY IN EXTREME CONDITIONS

Working in the quarry's tough, abrasive environment, AMI's Quarry Extracting Fork is a rock solid performer. Capable of pulling out and transporting heavy blocks across the quarry, this fork improves productivity in the harshest conditions.

- Strenx Performance Steel maximizes fork's strength to weight ratio
- Heavy duty construction for repeated wear and tear
- Excellent lift capacity for moving cut or blasted stone
- Standard taper tine options available
